Nissan GTR Skyline R34 by SP Engineering

24/02/2012 04:23 by admin

Before the Nissan GT-R began terrorizing roads the world over, Nissan’s original Godzilla was the Nissan Skyline R34 GT-R. The car isn’t being produced anymore, which adds a certain element of allure to it, particularly if a tuning company like SP Engineering has their hands on one. So here it is, a 2002 Skyline R34 GT-R that has been modified to insane numbers that even the GT-R has to bow to. Aesthetically, SP Engineering took the time to add an aerodynamic kit to the Skyline R34 GT-R, which includes a new Nismo front bumper, a carbon-fiber lip, an under tray, an FRP aero hood, new side skirts, a rear wing, ARC rear under-diffuser, Nismo carbon-fiber door pillar covers, and a new set of 19" Volk Racing alloy wheels with a Brembo GT brake kit. The interior also gets its share of new goodies, including a Nismo gauge cluster, floor mats, a suede steering wheel, Works Bell quick release, and dry carbon panels.[...]
