Bentley GT tuning by Premier4509

13/03/2009 11:30 by admin

Premier4509TM has announced a new update package for the Bentley GT. Premier4509 has worked to update the asthetics of the six year old car with an aggressive stance. 300 limited edition packages will be available worldwide and includes a new front bumper, side skirts, rear bumper, six piece grill set, rear deck spoiler and exhaust tips. "The design is similar to our exclusive wide body package launched in 2008", said company president, H. Yokomaku. "The response to the wide body package has been over whelming and there is a large demand to debut a non-wide version. We didn't want to do an exact replica of the wide body version, so we have made some changes to differentiate the two designs."

300 Bentley limited edition sets are available worldwide. Each set will include a uniquely numbered serial plate that will come framed with a certificate of ownership. Also available with the kit is the option to collect the Premier4509 limited edition forged 3 piece aluminum-alloy wheels as shown on the vehicle. Premier4509TM is based in Tskuba, Japan with offices in Paramount, California. Premier4509 is a brand developed and created by VeilSide, a Japanese automotive performance company that and specializes in automotive parts that include aero design, hard parts and luxury-performance wheels. The company owns two world records for racing as well as several design awards from the Tokyo Auto Salon.
