BMW M3 E92 by Active Autowerke

20/02/2010 20:50 by admin

The US-based tuning firm Active Autowerke released pictures of their BMW M3 E92.
Transforming the stylish BMW M3 include several exterior and interior customizations. New aerodynamic body kit made of carbon fiber, an aftermarket suspension kit, high performance exhaust system, carbon fiber front lip, carbon fiber rear diffuser for the exterior and a few interior accents for the interior. Other modifications include short shifter kit, performance software and pulley kit.
The Active’s BMW M3 E92 rides on the never before seen ADV.1 wheel designs. These new wheel designs are available in several sizes and colors including matte bronze, matte gunmetal, matte black, brushed gunmetal, and brushed aluminum. For this project they are wrapped with Nitto Invo tires 255/30/20 at the front and 295/25/20 for the rear.
