

Superchips Reveals Phase 2 Remap for MINI Cooper S R56

07/06/2011 01:15 by admin

Superchips has just unveiled its phase 2 ECU remap for the turbocharged 1.6-litre, 181 bhp engine in the the R56 MINI Cooper S (produced from 1st March 2010 onwards). Given the high demand for customisation parts for forced-induction hothatches, the British tuning specialist's in-house engineers were very enthusiastic to see what additional performance could be safely extracted from the Cooper S's direct injection turbocharged powerplant.

Analysis of the MINI's Bosch MED 17 ECU, in [...]
