

DMC LP700 M-GT: Lamborghini Murcielago Tuning

26/06/2012 16:10 by admin

The Lamborghini Aventador receives a lot of attention these days, but this doesn't mean that the world has forgotten about the Murcielago. The latest example that demonstrates this comes from aftermarket developer DMC, which has released a complex modification kit for the supercar. We'll start under the hood, where the V12 unit has been rebranded as LP700, which probably means that we get a power boost of 40 hp over th... [...]
