

Lamborghini Aventador Gets Capristo Exhaust

08/08/2012 13:02 by admin

The Lamborghini Aventador has been receiving more and more aftermarket goodies and the latest company to develop something for the Raging Bull is Capristo, which has recently presented a stainless steel exhaust system for the supercar. The V12 engine of the Aventador has been fitted with a custom exhaust made from 1.4828 (T309) stainless steel, which, to the driver's delight, includes remote-controlled flaps, which allow the per...
