

Mercedes-Benz C200 CDI by MCCHIP

27/07/2009 17:23 by admin

German tuning firm MCCHIP has developed an extremely mild modification package for the diesel-powered Mercedes-Benz C200 CDI with power and suspension upgrades. Thanks to the remapped engine control unit (ECU), the C200 CDI's 2.2-liter 4-cylinder diesel powerplant delivers an output of 170 horsepower and a maximum torque of 350Nm, up from 136HP and 270Nm respectively.

The package also includes new springs that lower the vehicle's ride height and a choice of performance wheel and tire combinations in sizes 18, 19 and 20 inches.
