

## A.R.T AS55K Yaas Edition based on the Mercedes-Benz G55 AMG

11/08/2009 11:57 by admin

This thoroughbred luxury four-by-four in Obsidian black with engine version AS55K was developed specially at the request of the Royal Family of Abu Dhabi. It is based on the G55 AMG. His performance was optimized up to 620 hp with 880 rpm. It will be difficult to find the equal anywhere in the world of this AS55K YAAS EDITION with its unusual exterior fittings and luxurious interior design.

Aerodynamic components for the front, side, rear, and roof, including the Aero hood lend the AS55K YAAS EDITION new striking contours. The comprehensive package of high-quality carbonized surfaces makes for individual highlights on the outer skin. The hood, aerodynamics components, the door handles, the spare wheel cover, the exterior mirror shells and the engine block have been generously coated in this luxurious material by hand to sparkle with that typical magical three-dimensional effect. This exterior variant with carbon parts was developed and manufactured on the wishes and in accordance with the decided suggestions of the Royal Family of Abu Dhabi.

Numerous highly-polished stainless steel decorative elements draw attention to the air vents and other predestined points on the car body. The dual polished stainless steel bumper with its profiled appearance provides the finishing touches to the smart solid appearance of the vehicle rear below the rear skirt.

Light, enough to illuminate the skies, is provided by the xenon lighting system with bi-xenon dual headlamps as the basis, four xenon upper-beam headlamps and four fog lamps as add-ons. The six chrome-plated tailpipes of the exhaust system, each sporting an A.R.T. logo, dissipate what remains of the vast power from the engine block laterally under the running boards: its grandiose sound cannot be ignored.

The high-performance brake system operates at the front with perforated 380 size brake disks and 8-piston brake calipers. At the rear, perforated 345 size brake disks and 4-piston brake calipers provide deceleration to match the power. The entire window surface of the AS55K YAAS EDITION is treated with chrome color window tinting, protecting the interior world of the vehicle from the stares of the outside world.

As soon as you open the doors of the AS55K YAAS EDITION, you cannot fail to notice the graceful interior surrounds to entice all the senses. The seats, instrument board, door cladding and center console have been intricately covered in aromatic materials by hand. A.R.T. upholsterers use the finest velour leather, perforated smooth nappa leather, and alcantara in cinnamon and anthracite hues. High-quality carpets with leather edging and A.R.T. embroidered logo round off the overall warm and luxurious ambience for that very special driving experience.

Carbon features also lend magical highlights to the interior of the AS55K YAAS EDITION. All the covers on the instrument panel and doors have been given a high-quality carbon veneer. These features are crowned by the gold-color carbonized multi-function steering wheel.

A journey into the magical world of fairytales with this expertly equipped luxury-class vehicle AS55K YAAS EDITION by A.R.T.
