

## Mercedes CL-Class W216 by MEC Design

13/08/2009 18:09 by admin

MEC Design has unveiled a new bodykit for the Mercedes CL W216.

Dubbed the 2FACE, the kit features an aggressive front end with a revised grille and modified front bumper. Out back, the car boasts a three-piece rear spoiler, a choice of two rear diffusers ("elegant" or "extreme sports"), and a sports exhaust system with four massive tailpipes.

Other styling tweaks include bold side skirts with available LED lighting and a choice of flat black or chrome MEC I three-piece wheels that measure 10.5x22 front and 11.5x22 rear.

Pricing information wasn't released, but expect the package to carry a healthy premium.
