

## Porsche Panamera by 9ff

24/08/2009 21:43 by admin

9ff, the specialist for turbo powered engines offers Turbo performance kits for the new Panamera which starts at 550 HP and actually reaches up to 650 HP. Moreover the company offers the first time a bodykit which reflects the additional power to the exterior.

The bodykit contains a new front bumper in 9ff design with optimized airflow, a new front lip for better performance at top speed, a new rear bumper with bigger diffuser in combination with 4 rounded end pipes and new designed side skirts.

The performance kits starts with the 9ff PT-55, which gets an ECU upgrade and 9ff Sport air filters and reaches 550 HP and a torque of 760Nm. The next level is the 9ff PT-60, which produces 600 HP and a torque of 800 Nm for the sporty 9ff Panamera customers. At his conversion the kit gets an additional 9ff sport exhaust system with sport catalytic converters which produces the typical 9ff turbo exhaust sound and is good for better performance. The recent peak of the 9ff Panamera conversion stages is the 9ff PT-65, 650 HP, 850 Nm of torque and a performance which is similar to supersportscars.

The 9ff PT-65 gets a 9ff sport air filter, 9ff ECU, 9ff engine cover, 9ff illuminated door sill protectors, 9ff sport exhaust system, new 9ff PT-65 turbochargers in exchange and a new engine bonnet with air vents for reducing the heat in the engine compartment.

9ff also offers new wheels for the 9ff Panamera Turbo. The well known 9ff disc design has been adapted to the new luxury sports vehicle. Now the car rolls on 22 inches, 3 piece design wheels.

There is also new interior design available at 9ff. The customer can choose between new materials, new colors and also different designs. The interior design gets changed upon request. There are nearly no limits in modifying the interior.
