

Volvo S60 by Heico Sportiv

27/09/2010 19:54 by admin

Heico Sportiv has unveiled their new tuning programs for the Volvo S60 2.0T and T6.

For the exterior the German tuner offers a front spoiler, a revised rear skirt and choice of dual or four-tailpipe sport exhaust systems, aluminum pedals, and an aluminum gear shift knob. To finish the aggressive look there are set of attractive gunmetal Volution wheels in size of 18 or 20-inch.

Under the hood thanks to the improved software by Heico Sportiv e.motion technology the 2.0T produces 293hp - an increase of 46hp and the T6 engine boasts 330hp. It allows the T6 model to accelerate from 0 to 100 km/h in 5.8 seconds, and to achieve top speed of 250 km/h (electronically limited)

The programs are already available but no word on pricing yet. The Heico S60 T6 is limited to 100 vehicles.
