

Extreme Performance Makeover Transforms the 2010 Camaro from Muscle Car to Supercar!

10/01/2009 23:08 by admin

SEALY, TX – Hennessey Performance Engineering (HPE), well known for their extreme performance sports cars and muscle cars, announces their Limited Edition 2010 HPE700 Camaro. At the heart of the beast is GM’s new LS9 supercharged V8 tweaked as only HPE could to 705 horsepower and 717 lb-ft torque. To qualify as a supercar under the HPE banner it can’t just go, it has to whoa. With optional 15 inch carbon brakes from the stunning new Corvette ZR1, light weight HRE wheels with Michelin PS2 tires and full suspension upgrades the HPE700 Camaro will be able to make full use of its new found power...
