

Audi Q7 Wide Track by Project Kahn

18/01/2011 00:56 by admin

Project Kahn knows a thing or two about tuning up LandRover models, but what started off a major LandRover project has spread like wildfire to include makes such as Porsche, Mercedes, Bentley, and now Audi. This time, the British tuner turned their attention to the brand new 2011 Audi Q7. The model already received an impressive facelift from the factory, but the package offered by Afzal Kahn, emphasizes the already clean and beautiful look of the SUV. While there were no modifications made to the engine, the widebody aerodynamic styling package includes modifications such as wide wheel arches, front wings with vents, front spats, rear bumper, exhaust trims, and a rear roof wing[...]
