

Porsche Panamera GrandGT Carbon Fiber by TechArt

26/01/2011 01:50 by admin

For a car that has many Porsche enthusiasts up in arms, the Porsche Panamera isn't scaring away any tuners from modifying the luxury sports sedan inside and out. We've seen kits from Mansory, Vorsteiner, Edo Competition, and many more, but we have a feeling that none of these tuning kits will hold a candle to the amount of carbon fiber that is juts oozing out of TechArt's new kit for the Panamera. Dressed in head to toe carbon fiber, TechArt's Porsche Panamera GrandGT is nothing short of CB heaven. We're talking a new front apron with a front grill insert and splitter, a rear diffuser, the gurney flap of the dominant rear spoiler, and the air ducts at the flanks of the car all made up of this highly touted material. The use of carbon fiber has led to an impressive dimensional stability, great strength, and a low intrinsic weight.[...]
