

Hennessey Grand Sport Corvette

03/02/2011 19:08 by admin

Hennessey Performance announced that a new tuning package will be offered for all the 2008-2011 Chevrolet Corvette models, including the Grand Sport versions. Thanks to a new supercharger system, the Hennessey Corvettes will deliver anywhere from 600 to 1000 HP, depending on customer's wishes. The most powerful version in the line-up is the HPE1000. It delivers an impressive 1000 HP at 6,300 rpm and includes: forged 427 cid LSX Engine, Hennessey HPE1000 Camshaft, high flow cylinder heads, ARP Main Studs & Head Bolts, FAST LSX intake manifold, fuel injector upgrade, fuel system upgrade, twin ball bearing turbochargers, electronic boost controller, HPE stainless steel turbo manifolds and stainless steel Cat-Back exhaust among others[...]
