

Ferrari California Vintage Package

17/02/2011 01:43 by admin

In an attempt to further entrench themselves to its exclusive customers, Ferrari is launching a new customization program that allows Ferrari owners to have their modern beasts be given a classic touch. Called the Vintage Package, the program is being offered for a wider-range of Ferrari models with the first of these models being the Ferrari California. Among the aesthetic additions added to the California through the Vintage Package include a unique front grille, door mirrors, and A-pillar trims to go along with special chrome highlights for the side vents. On top of that, the California Vintage Package will also include wheels with a diamond polish look. Performance specs for the California remain untouched so expect the same 4,300 cc V8 Direct Injection engine that appears in all California models. This particular engine can produce an output of 460 horsepower at 7,750 RPM and 357 lb/ft of torque at 5,000 RPM. Likewise, the engine is mated to a a seven-speed dual clutch transmission with a top speed of 192 mph and a 0-60 mph time of four seconds.[...]
