

Chevrolet Corvette ZR1 Brad Paisley Hero Edition

17/02/2011 18:00 by admin

Anytime you have a car that is being sold at a fund-raising event for a charity like the Kids Wish Network HERO program, then it's a great source of pride for those behind the initiative. Having a car that's been worked on by a tuning firm like Lingenfelter is extra gravy. The car, a Chevrolet Corvette ZR1, that has been designated as the "Brad Paisley Hero Edition ZR1", is a one-off Corvette that's powered by an LS9 supercharged 6.2 liter V8 engine with a Lingenfelter performance upgrade system that nets in over 700 horsepower, up from the 638 horsepower the stock Corvette comes in. This Corvette is then mated to a six-speed manual transmission with a twin-disc clutch that provide exceptional clamping power.
