

RUF Developing Electric Test Vehicles Based on the Porsche 911 Carrera

18/02/2011 16:20 by admin

Porsche tuner RUF Automobile is developing ten electric vehicles with three different powertrains based on the 911 Carrera (997), which will be put to the test in "real life situations". The prototypes are being manufactured in cooperation with German electronics giant Siemens AG and are going to be presented in the first half of 2011. The three[...]
