

Hemi Cuda by Droptop Customs

19/02/2011 03:28 by admin

If Chrysler doesn't end up utilizing the Cuda name they just recently registered, at least we'll have Droptop Customs' personal Cuda program to help dull the pain. Their new tuning project based off of the 2009 Dodge Challenger is powered by a 6.1 liter SRT8 HEMI engine mated to six-speed manual transmission. This engine is the same engine used in the 2009 Dodge Challenger SRT8, but we're expecting more than the 425hp and 420lb-ft of torque considering it will also be getting a Mopar Catback exhaust system and a pistol grip Hurst shifter. For even better performance, Droptop Customs also added a KW coilover suspension with strut tower braces for both the front and the rear axles.[...]
