

Chevrolet Camaro HTR850R by Redline Motorsport

22/02/2011 06:49 by admin

The stock output of the Chevrolet Camaro SS is 422 HP. Not bad for today's times, but also not very impressive. But what if you can get a Camaro SS with no less than 850 HP under the hood, and an extreme look? Redline Motorsport brought a package like this in SEMA, which by the way places top 10 SEMA Mothers award! Do we have to remind you there were more than 800 cars in there? Painted in white with blue racing stripes, the HTR850R package includes lightweight titanium parts, a supercharged engine that produces no less than 850 HP, custom 2618 alloy forged blower pistons, computer balanced rotating assembly, custom ground "Blower" Roller Camshaft, GM Race Lifters, 080? chromoly pushrods, ARP Fasteners, stainless steel intake/exhaust valve, HD Dual Valve Springs with Titanium retainers, locks and keepers, Borla stainless performance mufflers, ZR1 Clutch and Hydraulics and a custom HTR stripping package.[...]
