

Mercedes SLS AMG RSK8 by Lorinser

30/03/2011 01:38 by admin

Wait, is this yet another tuning package for the Mercedes SLS AMG? Well, color us surprised! This vehicle has seen so many tuning projects, we're beginning to think people have forgotten what a standard model looks like. But have no fear, this latest package only adds a new set of wheels courtesy of Lorinser and a tweak to improve the Mercedes's handling. The Mercedes SLS AMG RSK8 by Lorinser is set apart from its standard brethren with a new set of three-part forged wheels with seven spokes and stainless steel bolts. These light-alloy wheels are offered in 9.5 x 20" for the front axle and 11 x 21" at the back, and should be accompanied by 275/30 and 295/25 tires, respectively.[...]
