

Maserati GranTurismo Draken by SR Project

05/04/2011 03:06 by admin

SR Project has joined forces with Ferrari Maserati of Vancouver to develop a special GranCabrio for the 2011 Vancouver International Auto Show. The package is called "Draken" and includes exterior updates, improved suspensions, and a new set of wheels. The tuning package for the Maserati adds a bit of edge to an already classy ride. The exterior gets a new MC Sportline Aero front lip and a new set of wheels, Monotec T-03, measuring 21" at front and 22" rear. The exterior is smoothed out in a classic white while the wheels get a more aggressive matte black finish. The wheels are combined with a new set of Formula Dynamics Lowering Springs. The red leather interior finishes the look of the GranCabrio while adding a touch of color to the vehicle.[...]
