

## Novitec Brings it on the Maserati GranCabrio

12/04/2011 01:21 by admin

Enough is never enough for vehicle tuning houses like Novitec Tridente, which has presented its latest line of enhancements for the Maserati GranCabrio. Bone stock, the drop-top variant of the GT gets a 4.7-liter V8 engine that cranks out 440HP at 7,000 rpm and 490Nm (362 lb-ft) of torque at 4,750 rpm. The installation of a supercharger system along with a watercooled intercooler and a modified ECU, help boost output to an impressive 590HP at 7,300 rpm and 572Nm (421.9 lb-ft), consequentially allowing for a new 0-100km/h (0-62 mph) time of 4.5 seconds.
