

Honda CR-Z by Mugen

30/04/2011 03:59 by admin

The hybrid craze has gone to new levels and everyone wants in on the action. Unlucky for those that are late in joining the game, Mugen has come around with yet another version of the Honda CRZ, promising to transform the vehicle into one "hot hybrid hatch." Their newest package comes with a killer supercharger that takes the CRZ to a greater level of performance, and possibly a better fuel economy as well.

The Honda CRZ Mugen will still come with its standard 1.5L four cylinder engine, but will get the boost in power from a new supercharger. Standard outputs for the CRZ come in at 113 HP and 107 lb-ft of torque for just the engine, while adding the standard hybrid package will get those outputs up to 122 HP and 128 lb-ft of torque. Mugen has taken their upgrade a step further by developing their own electronic package that, together with the supercharged engine, will deliver a total of 197 HP and 181 lb-ft of torque. Just like there's no sex in the champagne room, there's no slacking over at Mugen's place either.[...]
