

## Bentley Continental GT Cabriolet by Prior Design

01/05/2011 22:41 by admin

Anyone taking on the task of tuning a Bentley Continental GT Convertible better know what they are doing if they want to end up making the car look even more luxurious than it already is. Thankfully, Prior Design has had a little experience in this department with tuning projects such as the BMW M5 F10 and the Mercedes E-Class Coupe. Their newest project reshapes the convertible with aerodynamic pieces and some interior modifications.

The aerodynamic kit includes a new front bumper with an integrated carbon fiber bottom lip that reduces the updraft at the front axle. It also includes two air inlets on the hood, a massive sports grille with two carbon-fiber air outlets on top, a set of traditional side sills, and a new bumper with integrated diffuser for the rear. The final touch has been provided by a stainless steel sports exhaust system cleanly integrated into the tail. For the interior, the tuner jazzed it up a bit with wooden decorations and exclusive carbon fiber insertions.[...]
