

New Volkswagen Golf GTI Edition 35 Comes with 235-Horsepower

09/05/2011 19:00 by admin

This year, Volkswagen is celebrating the 35th anniversary of the introduction of the original Golf GTI in 1976, and to mark the event, the German carmaker has unleashed a special version, named "Edition 35". As with the "Edition 30" launched in 2006, the latest anniversary model benefits from an upgraded and more powerful engine as well as discreet styling tweaks that differentiate it from the standard Golf GTI. Starting with the mechanical updates, the GTI's 2.0-liter turbocharged TSI engine is tuned to deliver an extra 25 horsepower, for a total of 235 horsepower. The increase in output should improve the hot hatch's performance, but Volkswagen has not yet revealed any official figures, simply stating that the car will be more fun to drive. The automaker didn't say whether the "Edition 35" will feature a lower suspension than the stock car, as was the case with the "Edition 30".
