

Chipped Ford 2.0-liter EcoBoost Gains 40 More Ponies

09/05/2011 22:01 by admin

As Ford gradually spreads out its new 2.0-liter EcoBoost turbocharged four-cylinder engine to more models across its international lineup, tuners are jumping in to offer their performance goods. And the easiest way to do this of course is by reprogramming the car's engine controller. Superchips Ltd has developed a new firmware upgrade for the European version of the four-cylinder EcoBoost currently found on the refreshed S-Max and Galaxy minivans, as well as the Mondeo.[...]
