

Oakley Design Introduces the Lamborghini Aventador LP760-2

06/06/2011 17:09 by admin

Oakley Design has taken on the challenge to tune Lamborghini's latest creation, the Aventador LP700-4, introducing the LP760-2, a work-in-progress project. Well, the name says it all, but you can stay with us for the juicy details.

The V12 unit will receive an ECU remap, a tweaked airbox, new air intake pipping, as well as a titanium exhaust system. This will allow the engine to deliver around 760 hp and 745 Nm of torque.

Things get really interesting if we take a look at how the power [...]
