

Oettinger Remaps VW Group's 1.6 TDI Engine

07/06/2011 07:22 by admin

Downsizing is THE word in the automotive industry these days and tuners are, of course, as up to date as possible. The latest modification goodie for an engine that follows the aforementioned concept has been released by Oettinger, which is targeting the 1.6-liter TDI unit of the VW Group, which can be found on models belonging to the Audi, SEAT, Skoda and Volkswagen brands.

In factory stock form, the unit offers 90 hp or 105 hp, with Oettinger introducing ECU remaps that increase the [...]
