

Porsche Vorsteiner 997 Turbo Project 650 HP by Autodynamica

16/06/2011 23:22 by admin

There are hundreds, if not thousands, of tuning projects circling the automotive industry at any given time. Some are extensive, offering a complete package to transform the vehicle into a new and improved model, and others only offer minor adjustments to slightly tweak the car's look. The latter group are the ones that can always benefit from some additional attention. Turns out, American tuner, AutoDynamica, share our sentiments as they have taken the Porsche 997 Turbo by Vorsteiner and added certain elements to complete its package.[...]
