

## Mercedes AMG E-Klasse Upgraded by Brabus

18/07/2011 12:45 by admin

The specialists at Brabus have spent some time in the wind tunnel and developed various aerodynamic-enhancement components that are meant to improve the AMG models' sporty looks. The tuners have just presented their ex-factory AMG body styling kit for the Mercedes E-Klasse, comprising a front spoiler lip that attaches to the lower part of the AMG front apron, reducing lift on the front axle for further improved directional stability.

The E-Klasse sedan also gets a diffuser and rear spoiler ... ([read more](#))
