

RUF's 750 HP CTR3 Officially Unleashed

21/07/2011 10:27 by admin

The omniscient Porsche tuning company RUF has managed to take the Cayman model to a higher level than ever before. The CTR 3, as it's called, features a newly developed body which is not based on any existing mid-engine concept, and is made entirely of Kevlar-carbon composite.

The interior can be designed to the customer's taste, from a functional lightweight finish to a sporty luxury finish mixed with Alcantara leather. Also the aluminum gearshift lever for the sequential shift transmissio... [...]
