

Turbocharge Your Mazda Miata and Get a Free Goat!

29/07/2011 09:16 by admin

If you thought that automotive producers choose unconventional ways of promoting their products, we have to announce you that aftermarket developers might have even more unconventional ideas.

We'll get straight to the point: Flyin' Miata, a tuning parts source for the Mazda Miata (MX-5) has something special for those who are willing to turbocharge their rides.

Order the Miata FMII turbo kit and you won't just get a forced induction package that will make your Miata... fly and name that so...[...]
