

Audi A7 3.0 TDI Quattro by MTM

01/08/2011 21:00 by admin

German tuner, MTM, has unveiled a new tuning package for the Audi A7 3.0 TDI Quattro. The package includes a new suspension system, new wheels and an impressive engine update - offered in two different levels. First deliveries will be made at the end of August 2011. In its standard version, Audi's 3.0 liter delivers a total of 245 HP and a peak torque of 368 lbs-ft. MTM, however, has found a solution to improve the engine's total output with two different levels of updates. In the first package the output has been increased to 285 HP and 427 lb-ft and the second sees an increase to 300 hp and 442 lbs-ft of torque. Both updates take only 90 minutes and include an M-Cantronic system, an updated control unit, and a perfectly adjusted exhaust system with four 89mm tail pipes. This is a visible sign that an MTM diesel is expected rather on the fast lane than on the slow lane. Top speed has been increased to 163 mph.[...]
