

## Chevrolet Camaro ZL1 by Hennessey

12/08/2011 04:43 by admin

The new Chevrolet Camaro ZL1 is a heart-stopping, adrenaline-rushing machine packed with a 550 HP LSA 6.2L supercharged V-8 engine. Anyone would be crazy to turn it down, but when Hennessey takes the wheel and manipulates even more power from this engine, the car becomes an unstoppable force suitable only for the most experienced driver. Meet the five engine updates - HPE600, HPE650, HPE700, HPE800 and HPE1000 - that will take your Camaro ZL1 from "standard" to unbelievable. The first and "tamest" package from Hennessey is the HPE600. This base version offers an output of 610 HP at 6000 rpm. Next to the mild power increase, this package also provides an HPE cold air induction system, a supercharger pulley upgrade, an HPE engine management calibration, and, of course, Hennessey HPE600 badging on the exterior.[...]
