

Ferrari 599-VX by Vorsteiner

20/08/2011 14:00 by admin

German tuning company, Vorsteiner, has earned quite a reputation for being one of the foremost tuners of Bentley, Mercedes, Porsche, and BMW models. However, on that list, and the many other brands it has worked on, there's a conspicuous absence of Italian cars. Until now. For the first time in the company's illustrious history, Vorsteiner is working on a supercar from Italy, one that calls itself the Ferrari 599. The first dalliance between the German tuning firm and the Italian automaker has turned into a shining example of what the former is entirely capable of with just about any vehicle it customizes. The final product is called the 599-VX, which takes elements from the 599 GTB Fiorano and combines it with characteristics derived from the 599 GTO and the 599 XX. The full breadth of details surrounding this program will be unveiled in a week's time, but it's worth noting that the package includes, among other things, a new front end, hood, side skirts, rear deck lid, rear intake panel, and a rear bumper with an integrated diffuser. This eight-piece body kit is entirely made of carbon fiber while a new set of lightweight wheels forged from aircraft-grade aluminum adds even more flair to the 599-VX's profile.[...]
