

Ferrari 599-VX Customized by Vorsteiner

23/08/2011 18:24 by admin

The Ferrari 599-VX marks the the beginning of Vorsteiner's work on the Italian supercars. The famous V12-monster is the beginning of an entire line of applications for Ferrari models. The 599-VX project reveals the perfect mix between lightweight aerodynamics, performance exhaust and wheels.

As Vorsteiner legacy goes, the tuning company decided to create something that would not take away from the existing body lines of the Ferrari, but rather to enhance it, and taking it closer to a race car... [...]
