

1972 Electric Datsun Does 0-60 in 1.8 Seconds [Video]

06/09/2011 17:06 by admin

When talking about Datsun, most would be tempted to think about an old beat up car which drags itself on the asphalt, especially when the car is a 1972 model. But the car we are referring to demands respect. Despite the fact that it has a venerable age, the Datsun 1200 had become the world's fastest accelerating electric car, being able to go from 0-60 in just 1.8 seconds. Meanwhile, other super cars like the Bugatti Veyron are eating their hearts out when seeing the old nimble car getting around... [...]
