

Carlsson CS60 Royale Is Here

20/09/2011 23:47 by admin

It was only a matter of time until the Chinese market received its exclusive modification packages from European tuning and here we are talking about another example of this.

German tuning company Carlsson has developed the CS 60 Royale, a project based on the Mercedes-Benz S600, offering both visual and tech upgrades.

The twin-turbo V12 powerplant has been gifted with a sports exhaust and an ECU remap, and now delivers 600 hp instead of the factory stock power output of 517 hp. As for the...[...]
