

Lamborghini Gallardo Superleggera Conversion by JMS

01/10/2011 20:10 by admin

Until Lamborghini unveiled the LP 570-4 Super Trofeo Stradale at the Frankfurt Motor Show, the Superleggera has been considered the most impressive Gallardo in the line-up. But what happens when you already own a standard Gallardo and you want to get that Superleggera look? Don't head to the dealership, just call up German tuner, JMS. JMS has developed a tuning package that can transform any Gallardo into the Superleggera of your dreams. The package starts off with a couple of exterior modifications including new side skirts in two different versions: one in a matte black finish (1899 Euro or about \$2,564) and the other in real carbon with clear coat finish (3299 Euro or about \$4,480 at the current exchange rates). The other exterior mod is the beautiful new set of oz ultralight black ultraleggera racing wheels in 8.5 x19 with 235/35-19 tires and 11x19 with 295/30R19 tires (3899,00 Euro or about \$5,300). The original license plate has also been replaced with a new one and for better driving performance, JMS recommends a KW v3 coil over kit with the ability to lower the Lamborghini up to 35-40mm on both axles (3399 Euro or about \$4,615).[...]
