

Tuned Nissan GT-R Embarrasses Lamborghini Aventador LP 700-4 on the Drag Strip

03/10/2011 19:29 by admin

As they say, more equals less, or to put it into context, the more horsepower a car has, the less time it will need to cover a defined distance. And while the new Lamborghini Aventador LP 700-4 with its 6.5-liter V12 engine pushing out a hefty 700-horses for a factory 0 to 100km/h (62mph) sprint time of 2.9 seconds is by no means a slouch, 700HP is significantly less than around 1000HP. That was the case with the R35 that went up against the white Aventador in the drag strip race you're about to watch after the break. According to the YouTube poster, this wasn't your run-of-the-mill Nissan GT-R but a heavily tuned R35 packing close to 1,000-horses under its hood.[...]
