

Vorsteiner Porsche Cayenne V-CT Kit Preview

16/10/2011 13:59 by admin

The Porsche Cayenne is such a spoiled child. Imagine how it is to constantly receive new aftermarket gifts from all parts of the world, with this also bringing you into the spotlights over and over again.

Case in point: Vorsteiner is previewing a new modification package for the 958 (current generation) Cayenne. We are talking about an aerodynamic package that uses the V-CT designation, including a front fascia, side skirt extensions, a rear bumper that includes a diffuser, as well as a roof ... [...]
