We're pretty sure that Land Rover didn't expect the Range Rover to become one of the tuning world's favorite toys. We're not talking about modifications that upgrade the Range Rover's off-roading capabilities, but about tuning kits that try to make it cooler and offer it a more dynamic aspect.

Before we start describing the latest example of such a development, we have to tell you that we love the big Range, but we disapprove aftermarket bits and pieces that limit its off-road capacities.[...]
