

BMW Z4 Project Flashbang by SR Auto Group

19/10/2011 01:27 by admin

SR Auto Group impressed us with lots of impressive tuning package lately. If you remember just recently we have reported about the Project Deathbolt and the Project Veneto. And today its time to talk about the Project Flashbang based on the BMW Z4. The drawing board for Project Flashbang was filled with an abundance of ideas but in the end the tuner decided to go with what felt natural. SR Group is usually a tuner that modifies the least as possible. But with the Z4 they did a little bit more: they have added an AC Schnitzer front aero lip, a new front bumper, a two piece lip spoiler and a rear with a sharper edge.[...]
