

Mercedes CL500 4MATIC by Brabus

19/10/2011 22:36 by admin

Brabus's Mercedes line-up of vehicles continues to heat up with the recent announcement of two new performance packages for the CL500 4MATIC. Not content with the car's already robust 4.7-liter V8 twin-turbo engine that produces 435 horsepower and 516 lb/ft of torque? If so, Brabus has two power upgrades for you to choose from. The first one is called the 'Brabus B50 - 490', which consists of a new plug-and-play PowerXtra module that tweaks the engine's performance capabilities through improved electronics, ignition, injection, and electronic boost pressure control. The modifications result in a car that's capable of hitting 490 horsepower and 575 lb/ft of torque. Mighty impressive on its own right, yes? But if you're still not satisfied with that, Brabus is also offering something a little more powerful in the form of the 'Brabus B50 - 520', a program that carries all of the features of the 490 while also coming with an additional intercooler. The result is a mighty 520 horsepower and 604 lb/ft of torque on the CL500 4MATIC.[...]
