

Ford Focus by Steeda

23/10/2011 07:07 by admin

The armada of Ford Focus models headed to SEMA is nothing short of overwhelming. A total of seven Focus models - you read that right: seven! - are set to be unveiled, offering a wide variety of choices and options for the Blue Oval's sports hatchback. One company that worked on their own tuned-up version of the Focus is Steeda. As a veteran of Ford tuning since 1979, Steeda knows a thing or two about working on Ford performance vehicles and they're bringing all that experience and expertise on the new Focus with comprehensive aerodynamic and performance modifications. Among the modifications the Ford tuner gave to the Focus include a new Steeda cold-air intake with Cool Tube technology, a new rear swaybar, a front tower brace, and new lowering springs that improves the Focus's overall performance capabilities. On top of that, the Focus also received a 3dCarbon body kit, a G-Track front end brace, underhood billet aluminum-appearance items, and a new set of 19" HRE P43S Monoblock wheels wrapped in Nitto NT05 performance tires.[...]
