

Cadillac CTS-V Coupe "Martin V1000" by Martin Technologies

27/10/2011 01:44 by admin

The Cadillac CTS-V Coupe is a fast car in its own right, thanks to it carrying a 6.2-liter supercharged V8 engine that produces 556 horsepower and 551 lb/ft of torque. But what happens when 556 and 551 just aren't enough? Well, you turn up the heat and pack more performance. Hello Cadillac CTS-V Coupe "Martin V1000" by Martin Technologies! Speaking of power, there's a reason why this car was codenamed the "Martin V1000." It's powered by a 7.0-liter supercharged V8 engine that produces a mind-blowing 1,000 horsepower at 7,100 rpm and 900 lb/ft torque at 5,500 rpm, good enough figures to post a 0-60 mph time of just 3.5 seconds with a top speed that goes well north of 200 mph. To go with all that unmistakable power, Martin Technologies made sure that the Cadillac CTS-V Coupe looked about as good as any car with that much power should. So they dressed up the CTS-V Coupe with a Martin Technologies-designed body kit that comprises of two rear pieces, two rockers, a front chin spoiler, a rear decklid spoiler, and a set of custom 22" three-piece custom wheels and tires.[...]
