

Mitsubishi Lancer Evo IX Tuned to 780 hp at 11,000 rpm [Video]

01/11/2011 16:52 by admin

We all know that the Mitsubishi Lancer Evo can server as the perfect base for extreme tuning projects that take performance to a sky-high level and we're here to give you another example of that, an Evo IX that can rev up to 11,000 rpm!

The crew over at Speednation.tv got their hands on this manchine, a black Evolution IX MR that received heavy tech mods from Extreme Tuners, a company based in Greece. The vehicle's four-cylinder engine was convinced to deliver 870 hp.

In order to handle al... [...]
