

Mazda2 by 3dCarbon

02/11/2011 21:10 by admin

The Mazda Turbo2 won't be the only green Mazda getting some attention at the 2011 SEMA Auto Show. 3D Carbon has arrived with its own Mazda2 tuning package to share the spotlight. Painted in a very cool Spirited Green Metallic paint, the 3dCarbon Mazda2 is highlighted with a vinyl graphic design courtesy of Sticky Fingers Design and darkly tinted side and rear windows. The colorful additions to the Mazda2 are joined by a body kit manufactured in a high-pressure polyurethane injection molding. The body kit includes a front air dam, side skirts, a rear lower diffuser, and a Mazda2 Touring-spec upper rear spoiler. The exterior kit is topped off with a new set of 18" FIVE:AD S6:F Gunmetal wheels wrapped with Yokohama S.drive 215/35R18 tires. The vehicle will also be equipped with an Eibach Springs Pro-Kit that improves handling as well as visual appeal.[...]
