

Honda Civic Si by Bisimoto Engineering

03/11/2011 18:16 by admin

If you want to talk about taking a mild-mannered 2012 Honda Civic Si and tuning it up to a whole new level, you might have found the car that will serve as inspiration for your over-the-top fantasies. Bisimoto Engineering, an aftermarket company based in Ontario, California and run by Bisi Ezerioha, has prepared a completely modified Civic Si for the 2011 SEMA Auto Show. You know how there are always those cars in SEMA that just blow you away because of the sheer audacity and lunacy behind its program? This is one of them, and for all the right, albeit crazy, reasons. Bisimoto designed this car to be the ultimate-do-everything racer. It can drag race, it can hit the touring scene, and it can even do a little time-attack. So how is it capable of all that considering that the stock version of the Civic Si "only" carries a 2.4-liter inline 4-cylinder engine that produces 201 horsepower?[...]
